Transplantation Proceedings

AN OFFICIAL PUBLICATION OF THE TRANSPLANTATION SOCIETY

Contents of Volume II, Index of Authors and Subjects

CONTENTS

No. 1 (March)

Introduction. *Rupert E. Billingham and Willys K. Silvers* 3

Genetic Organization and Gene Action of Mouse *H-2* Region. *Donald C. Shreffler and Jan Klein* 5

Polymorphism of Histocompatibility Genes in the Mouse. *Ralph J. Graff* 15

Immunogenetic Components of Weaker Histoincompatibility Systems in Mice. *W. H. Hildemann, M. Morgan and L. Frautnick* 24

Four Approaches to Estimating Number of Histocompatibility Loci. *Donald W. Bailey* 32

Strain C57BL/10 ScSn and its Congenic Resistant Sublines. *J. H. Stimpfling and A. E. Reichert* 39

Effects of Proteolytic Enzymes on Murine H-2 Antigens. *Marianna Cherry, I. Hilgert, A. A. Kandutsch and G. D. Snell* 48

Dynamics of Immunologic Enhancement. *Nathan Kaliss* 59

Mechanisms of Immunologic Enhancement. *D. B. Amos, I. Cohen and W. J. Klein, Jr.* 68

Restrictions of Antibody Production Against the H-2 Antigenic Complex. *Gustavo Hoecker, Alicia Ramos and Arturo Ferreira* 76

Humoral Antibody in Allograft Reactions. *Henry J. Winn* 83

Immunologic Approach to Cancer. *N. A. Mitchison* 92

Immunogenetic Approach to Neoplasia. *Judith R. Tennant* 104

Studies of Tumor Antigens and of Tumor-specific Immune Mechanisms. *Lloyd W. Law* 117

Implications of Cross-reactivity in the HL-A System. *J. R. Batchelor and A. R. Sanderson* 133

Low Viability, Skin Lesions, and Reduced Fertility Associated with Microcytic Anemia in the Mouse. *Elizabeth S. Russell, Eleanor C. McFarland, and Edith L. Kent* 144

Contributions of the Rat to the Immunobiology of Tissue Transplantation. *Willys K. Silvers and R. E. Billingham* 152

Maternal-Fetal Interactions and Histocompatibility Antigen Polymorphisms. *Joy Palm* 162

Bibliography of George D. Snell. *Joan Staats* 174

No. 2 (June)

Foreword. *W. H. Hildemann and E. L. Cooper* 179

Introduction. *E. L. Cooper* 180

A Classification of Animals 181

INVERTEBRATE SESSION I

Transplantation in Protozoa. *Vance Tartar* 183

Nucleo-Cytoplasmic Incompatibilities in Free-living Amoebae. *Lester Goldstein* 191

Specificity of Aggregation in Porifera. *Thomas D. Humphreys* 194

Cell Aggregation: Molecular Specificity in Outer Cell Surface Materials. *Harold C. Slavkin* 199

Transplantation in Coelenterates. *Richard D. Campbell and Carol Bibb* 202

Transplantation in Cnidaria. *Stanley Shostak* 212

INVERTEBRATE SESSION II

Transplantation Immunity in Helminths and Annelids. *E. L. Cooper* 216

Specificity of the Allograft Reaction in *Eisenia foetida*. *Pierrette Chateau-reynaud-Duprat* 222

Immunity in Mollusca With Special Reference to Reactions to Transplants. *Thomas C. Cheng* 226

Immunity in Mollusca. *M. R. Tripp* 231

Immunity in Insects. *W. Fred Hink* 233

Transplantation Specificity in Echinoderms and Lower Chordates. *G. Freeman* 236

Studies of Protein Uptake by Echinoderm Cells: Their Possible Significance in Relation to the Phylogeny of Immune Responses. *Henry R. Hilgard* 240

General Discussion 243

VERTEBRATE SESSION I

Introductory Considerations. *Roy L. Walford* 249

Transplantation Immunity in Fishes: Agnatha, Chondrichthyes and Osteichthyes. *W. H. Hildemann* 253

Functional Aspects of Fish Antibodies. *L. William Clem* 260

Genetics of Tissue Transplantation in Teleostei. *Klaus D. Kallman* 263

Observations on the Genetics of Transplantation. *D. C. Shreffler* 272

Tissue Transplantation Immunity and Immunologic Memory in Urodela and Apoda. *Nicholas Cohen* 275

Phylogenetic Status of Immune System in *Xenopus*. *John D. Horton* 282

VERTEBRATE SESSION II

Transplantation Immunity and Tolerance in Anurans. *E. Peter Volpe* 286

Immunologic Competence of Lymphoid Cells in Young Amphibian Larvae. *Louis Du Pasquier* 293

No. 3 (September)

Editor's Note. *Felix T. Rapaport* 297

VERTEBRATE SESSION II (CONCLUDED)

Transplantation Immunity in Reptilia. *Myrin Borysenko* 299

In Vitro Studies of Immune Capacity of Amphibians and Reptiles. *Robert Auerbach* 307

Evolutionary Aspects of Immunity and Lymphoid Organs in Vertebrates. *E. Diener* 309

Phylogenetic Origins of Antibody Structure. *John J. Marchalonis* 318

Role of Afferent Lymphatics and Lymph Nodes During Sensitization and Effector Mechanisms of Cellular Immunity in Birds and Mammals. *Daniel Y. E. Perey and J. M. Dupuy* 321

Comparative Reactions in Birds and Mammals. *J. Ivanyi* 329

Acute and Chronic Graft Rejection: Possible Phylogeny of Transplantation Antigens. *Nicholas Cohen and Myrin Borysenko* 333

General Discussion 337

Summary and Prospect. *W. H. Hildemann* 339

Participants in the Symposium on the Phylogeny of Transplantation Reactions 340

Cooperative Group on Bone Marrow Transplantation in Man. *Charles C. Congdon* 342

Glomerulonephritis in Human Renal Homotransplants. *D. M. Hume, W. A. Sterling, R. J. Weymouth, H. R. Siebel, G. E. Madge and H. M. Lee* 361

The Occurrence of Glomerular Basement Membrane-reactive Antibodies in Antihuman Antithymocyte Globulin. *H. E. Taylor* 413

Detection of Circulating Antiglomerular Basement Membrane Antibodies in Humans. *A. S. Markowitz and F. T. Rapaport* 417

Do Mild Infections Trigger the Rejection of Renal Allografts? *Richard L. Simmons, Richard Weil, III, Marion B. Tallent, Carl M. Kjellstrand and John S. Najarian* 419

Heterophile Antibody Response to Skin Grafts in Antilymphoblast Globulin-treated Patients. *Edward E. Etheredge and John S. Najarian* 424

Kidney Transplants Using Living Unrelated Donors. *Samuel L. Kountz, Herbert A. Perkins, Rose Payne and Folkert O. Belzer* 427

No. 4 (December)

Introduction. *Keith Reemtsma* 431

Molecular-Genetic Approaches to the Classification of Animals. *Morris Goodman* 432

Cross-Species Transplantation in Embryonic and Neonatal Animals. *David Steinmuller* 438

Discussion 446

Role of Streptococcal and Other Heterlologous Antigens in Transplantation. *Felix T. Rapaport* 447

Leukocyte Antigens of Chimpanzees and Their Relation to Human HL-A Antigens. *H. Balner, A. van Leeuwen, W. van Vreeswijk, H. Dersjant and J. J. van Rood* 454

Tissue Antigens of Man and Chimpanzees: Their Role in Xenografting. *Richard S. Metzgar and H. F. Seigler* 463

Immunologic Aspects of Cross-species Transplantation. *C. W. DeWitt* 468

Discussion 475

Radiation Chimeras. *D. W. van Bekkum* 479

Specific Suppression of Renal Allograft Rejection by Treatment With Antigen and Antibody. *Frank P. Stuart, Frank W. Fitch and Donald A. Rowley* 483

Studies on Heterologous Antilymphocyte Serum in Mice. VII. Optimal Cellular Antigen for Induction of Immunologic Tolerance with Antilymphocyte Serum. *Anthony P. Monaco and Mary L. Wood* 489

Response of Mice to Xenografts of Skin. *Eugene M. Lance* 497

Discussion 502

Clinical Heterotransplantation of the Liver. *Geoffrey R. Giles, Hans J. Boehmig, Hiroshi Amemiya, Charles G. Halgrimson and Thomas E. Starzl* 506

Experimental Islet Cell Grafting: A Transplantation Model. *Keith Reemtsma* 513

Effect of Immnosuppression and Cellular Antigen on Xenograft Survival. *James Cerilli, Lenoard Gideon and Dorothy Hattan* 516

Mechanism and Modification of Rejection of Heterografts Between Divergent Species. *Geoffrey R. Giles, Hans J. Boehmig, John Lilly, Hiroshi Amemiya, Hiroshi Takagi, Adolf J. Coburg, William E. Hathaway, Curtis B. Wilson, Frank J. Dixon and Thomas E. Starzl* 522

Discussion 538

Suitability and Availability of Chimpanzees as Organ Donors for Man. *Jack D. Douglas* 539

Comparative Physiologic Studies in Primates. *C. H. Kratochvil* 542

The Cape Western Baboon in Organ Allotransplantation. *G. P. Murphy, H. D. Brede, E. Cohen and J. T. Grace, Jr.* 546

Organ Transplantation Between Widely Disparate Species. *Roy Y. Calne* 550

Discussion 554

Summary. *Sir Michael Woodruff* 557

Author Index

Amemiya, H., 506
Amemiya, H., 522
Amos, D. B., 68
Auerbach, R., 307

Bailey, D. W., 32

Subject Index

Aggregation of cells, in sponges, 194-200, 243-244
Agnatha, transplantation immunity in, 253-255
Alleles, non-H-2, typing for, 15-23
Allelic frequency data, in classification of animals, 437
Amino acid frequency data, and classification of animals, 432-435
Amoebae, transplantations in, 191-193
Amphibians
  immunoglobulins in, 319
  lymphoid tissue in, 310-313
  transplantation immunity in, 282-295, 307-308, 333, 337
Anemia
  aplastic, from chloramphenicol, marrow grafts in, 345, 350, 351
  microcytic, in mouse, 144-151
Annelids, transplantation immunity in, 216-224, 249
Antibodies
  and antigen complexes
    in glomerulonephritis in renal homotransplants, 371, 375
    heterologous, 447-451
    in immunologic enhancement, 71-74
  fish antibodies, 260-261
  to glomerular basement membrane
    in antilymphocyte globulin, 413-416
    detection of, 417-418
    in renal homotransplants, 371-374, 375
  humoral
    in allograft reactions, 83-91
    and graft rejection, 424-425
    and transplantation immunity, 260, 322
  phylogenetic origins of antibody structure, 318-320
  suppression of anti-H-2 antibodies, 76-81
Antigen, pretreatment with, and graft survival, 483-487, 516-520
Antilymphocyte serum or globulin
  affecting viral-induced neoplasms, 126-127
  baboon studies, 547-548, 554
  with cellular injections, and xenograft survival, 516-520
  and glomerulonephritis in renal homotransplants, 374
  heterologous, and induction of tolerance, 489-496
  and heterophile antibody response to skin grafts, 424-425
  marrow grafts with, 346-347, 354
  toxicity of, 374, 413-416
Antisera with H-2 specificities, 59-60, 74, 133-142
Anurans
  transplantation immunity in, 283, 286-291, 333
  xenografts with urodeles, 439, 446
Aplasia from chloramphenicol, marrow grafts in, 345, 350, 351
Apoda, transplantation immunity in, 275, 333
Arthropods, immune competence of, 246
Ascidians, transplantation specificity in, 236-239
Association, and estimation of H locus number, 35-36
Asterina, transplantation specificity in, 236
Autolysis, affecting H-2 antigen activity, 49
Autosomal incompatibilities, congenic, 24-25
Azathioprine, and glomerulonephritis in renal homotransplants, 374

Baboons
  antilymphocyte globulin studies, 547-548, 554
  organ allograft studies, 546-548
  orthoptic liver graft from pig, 552-553
Backcross generations
  and estimation of H locus number, 32-33, 35
  maternal genotype affecting, 164-169
Basement membrane. *See* Glomerular basement membrane
Birds, transplantation immunity in, 321-324, 329-331
Bone marrow. *See* Marrow
Bursa of Fabricius excision, and homograft immunity, 323, 330

Carbohydrate model, of H-2 system, 10-12
Cell aggregation, in sponges, 194-200, 243-244
Cellular antigen pretreatment injections, and graft survival, 483-487, 516-520
Chameleon, transplantation studies in, 300
Chickens, transplantation immunity in, 321-324, 329-331
Chimerism, radiation, 479-481
Chimpanzees
  antigens of, 454-466
  as organ donors for man, 506-511, 539-541, 551, 554

Chloramphenicol aplasia, marrow grafts in, 345, 350, 351
Chondrichthyes, transplantation immunity in, 255-256
Chymotrypsin, affecting H-2 antigen activity, 55-56
Cnidaria, transplantation in, 212-214
Cockroaches, immune response in, 249
Coelenterates, transplantation in, 202-214, 244-245
Colon tumor, marrow grafts in, 344
Congenic resistant sublines, of mice, 39-46
Cortisone, and suppression of anti-H-2 antibodies, 76-81
Cross-reactions
  in HL-A system, 133-142
  with streptococcal antigens, 448-450
Cross-species transplantation. *See* Xenografts
Cyclophosphamide, with marrow grafts, 342-346, 353-354
Cyclostomes, immunoglobulins in, 319
Cytoplasm-cytoplasm incompatibilities, in amoebae, 193

Diet, affecting immune response, 249
DNA
  oncogenic viruses, antigens of, 118
  sequence data in classification of animals, 436-437
Dogs, xenografts in, 523-536, 552

Earthworms
  adoptive transfer of immunity in, 219-220
  specificity of immune response in, 219, 222-224
  temperature affecting immune response in, 219, 251
  transplantation immunity in, 216-224, 245, 249, 335
Echinoderm cells, protein uptake by, 240-241
EDTA, affecting cell aggregation in sponges, 197, 200
Eisenia foetida. *See* Earthworms
Elasmobranchs, immunoglobulins in, 319
Embryonic animals, xenografts in, 438-446
Enhancement, immunologic, 59-75
  and afferent inhibition, 62, 68
  antibody-antigen complexes in, 71-74
  antisera for, 59-60, 74
  central basis for, 64
  and efferent inhibition, 63, 68
  and immunoglobulin classes, 90
  and kidney graft survival, 65-66, 74
  low dose form, 68, 74
  and oncogenesis, 130
  tissue types affecting, 65
Enzymes, proteolytic, affecting H-2 antigen specificities, 48-58

Fabricius bursa excision, and homograft immunity, 323, 330
Fishes
  antibody studies, 260-261
  immunoglobulins in, 318
  lymphoid tissue in teleosts, 309-310
  number of histocompatibility loci in, 265-266, 272
  transplantation immunity in, 253-269, 333, 337
  unisexual reproduction in, 268
Frogs, transplantation immunity in, 283, 286-291, 333

Galleria mellonella, immunity in, 233-235
Genetics
  congenic resistant sublines in mice, 39-46
  estimation of H locus number, 32-38
  and molecular classification of animals, 432-437
  mouse H-2 system, 5-13
  polymorphism of histocompatibility genes, 15-23, 162-171
  proteolysis affecting H-2 antigen specificities, 48-58
  weaker histocompatibility systems, 21, 24-30, 272, 335
  See also Histocompatibility
Glomerular basement membrane, antibodies to
  in antilymphocyte globulin, 413-416
  detection of, 417-418
  in renal homotransplants, 371-374, 375
Glomerulonephritis in renal homotransplants, 361-408
  and acute cellular rejection, 371
  and acute humoral rejection, 366-368, 377
  agents causing, 374-375
  and antibodies to glomerular basement membrane, 371-374, 375, 413-418
  antigen-antibody complexes in, 371, 375
  from antilymphocyte serum, 374
  cases described, 384-405
  and chronic humoral rejection, 368, 377
  diagnosis of, 375-379
  glomerular ischemia in, 375
  incidence of, 362-366, 381-384
  mechanisms of, 366-375
  nephrectomy in, 406-407
  and proteinuria, 379-380, 404
  and retransplantation results, 404, 405-406
Graft-versus-host reactions
  after marrow grafts, 342-360
    criteria for, 356
    prevention of, 356-359
  and tolerance induction after heterologous ALS, 489, 494-495

H-2 system. *See* Histocompatibility
Hagfish, transplantation immunity in, 253-255, 337

Heart transplants
in newts, 279-280
in rats, 159-160
serum antibody affecting, 89
Helminths, transplantation immunity in, 216-224
Hemagglutinin, in invertebrates, 246
Hepatoma, thymectomy affecting, 129
Hermaphroditic fish, graft survival in, 268
Heterografts. *See* Xenografts
Histocompatibility
antibodies against HL-A antigens, and glomerular injury in renal homografts, 366-367
antisera with H-2 specificities, 59-60, 74, 133-142
carbohydrate model of region, 10-12
congenic resistant sublines of mouse strains, 39-46
cross-reactivity in HL-A system, 133-142
genetic organization of H gene system, 5-10
human HL-A antigens compared to chimpanzees, 454-461
and Ir-gene activity, 5, 7, 273
loci on sex chromosomes, 24-30
in lower vertebrates, 272-273, 335
mechanism of gene action, 10-13
mouse H-2 system, 5-13
mutation data, 36-37
non-H-2 antigens, 335
congenic resistant sublines, 40-43
and graft survival, 21, 24-30
typing for, 15-23
number of loci
estimation of, 32-38
and graft survival in fish, 265-266, 272
polymorphism of genes, 15-23
and maternal-fetal interactions, 162-171
protein model of region, 12-13
proteolysis affecting H-2 antigen specificities, 48-58
specificities in, and graft rejection, 335
suppression of anti-H-2 antibodies by cortisone, 76-81
and tumorigenesis, 111-113
weaker systems of, and graft survival, 21, 24-30, 272, 335
Hodgkin's disease, marrow grafts in, 343
Hydra, transplantations in, 202-214

Iguana, transplantation studies in, 300
Immune deficiency diseases, marrow grafts in, 348-350, 351
Immunoglobulins
deposits on glomerular basement membrane, in renal homotransplants, 377
in lower vertebrates, 318-320
Inbred lines, partial, and estimation of H locus number, 33-35
Insects, immunity in, 233-235, 246
Invertebrates, immunologic studies of, 182-247
amoebae, 191-193
chordates, lower, 236-239
coelenterates, 202-214, 244-245
discussion of findings, 243-247
earthworms, 216-224, 245, 249, 251, 335
echinoderms, 236
insects, 233-235, 246
mollusca, 226-232
protozoa, 183-193, 243
sponge cell aggregation, 194-200, 243-244
Stentor coeruleus, 183-189
transfer of immunity, 219-220
tunicates, 236-239, 246-247
Ir-gene activity, 5, 7, 273
Islet cells of pancreas, transplantation of, 513-515
Isolation of H alleles, and estimation of H locus number, 32

Kidney transplants
allograft rejection after infections, 419-423
antigen pretreatment in, 483-487
between dogs and pigs, 523
glomerulonephritis in, 361-408
See also Glomerulonephritis
between goat and dog, 552
